

Dear All

I am writing to request assistance in identifying and accessing research ethics documentation for a literature review I am doing, focusing on research ethics with regard to research with and on children. This review is being done on behalf of the UNICEF Innocenti Research Centre and the Child Protection Monitoring and Evaluation Reference Group (CP-MERG) Technical Working Group on Violence against Children.

In order to conduct a thorough review I am asking for assistance in identifying and accessing documentation related to research ethics. Specifically, I am interested in ethics guidelines, procedures, protocols and documentation relevant to research activity with children and young people.

I would be most appreciative if you could email me any ethics documentation or resources used to guide research, or any references that identify resources I can follow up on. While the review is specifically interested in ethics relating to research with children, I am keen to review any documentation pertaining to research ethics that may be relevant. Documentation and references in languages other than English would be particularly welcome. Please send any ethics guidelines, procedures, documentation and references to me at: [mpowell.researchethics@gmail.com](mailto:mpowell.researchethics@gmail.com)

I appreciate any assistance you are able to give with this. Please do not hesitate to contact me if you have any suggestions, comments or queries regarding this request.

Kind regards  
MaryAnn Powell
